

# CONECTA CON FUNAX

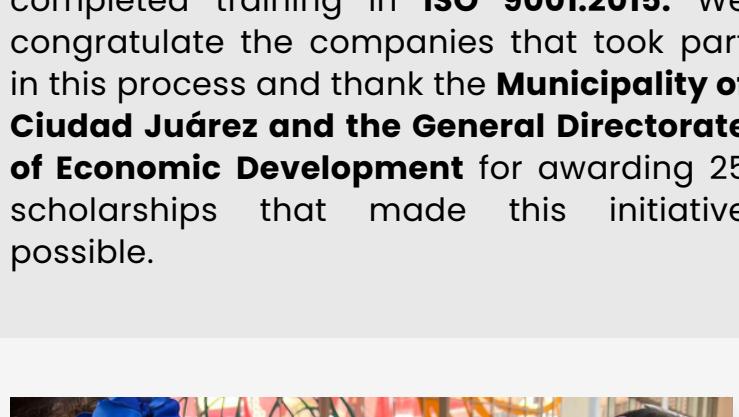

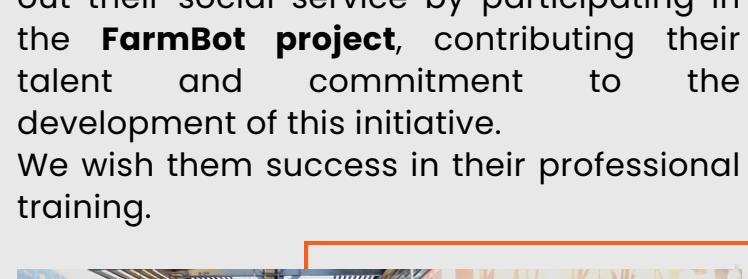

After a month of collective work and fundraising, we participated in the symbolic presentation of checks from **Juárez Giving Day**, a moment that reflects the joint effort of organizations and allies committed to the well-being of our community.

We congratulate all participating organizations and thank **Fundación Paso del Norte** for leading and coordinating this important collaborative effort.

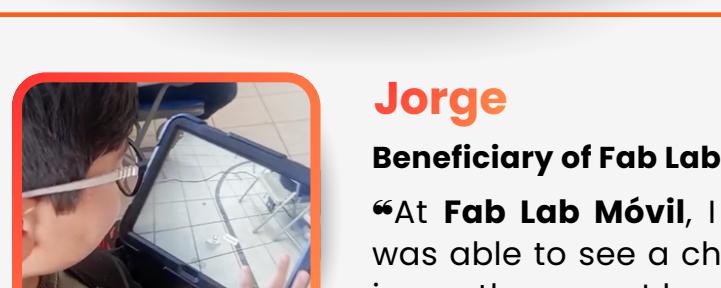

As part of our educational strengthening efforts, we brought **Fab Lab Móvil** to teachers at **Secundaria Técnica 79**, who learned about and explored technological tools that enrich **teaching and learning** processes. This activity was made possible thanks to the support of **United Way Chihuahua and Aptiv**.

Students from **Technical Secondary Schools 84, 93, 75, State Schools 3042 and 3087**, as well as **Secondary School Del Magisterio 8392** and **Federal School 16**, successfully completed the 12 sessions of the **Fab Lab Edu** program. This achievement was made possible thanks to the support of the **Municipal Government of Ciudad Juárez, FECHAC, and the Rosario Campos de Fernández Foundation**.

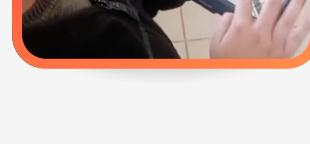

Through the **PYMAIS** project, we successfully completed training in **ISO 9001:2015**. We congratulate the companies that took part in this process and thank the **Municipality of Ciudad Juárez and the General Directorate of Economic Development** for awarding 25 scholarships that made this initiative possible.

**Mechatronics Engineering students from Tec de Monterrey**, Ciudad Juárez, carried out their social service by participating in the **FarmBot project**, contributing their talent and commitment to the development of this initiative. We wish them success in their professional training.

We took part in the **Futuras STEM** event, led by **UNICEF México and Tecnologicas**, a space that promotes interest in science and technology among girls and teenagers. We would like to thank the organizing institutions, as well as schools, families, and women STEM leaders for joining forces to **inspire new generations**.

**Jorge**

**Beneficiary of Fab Lab Móvil**

“At **Fab Lab Móvil**, I discovered **augmented reality** using an app. I was able to see a character I had created myself in a **3D model**, and in another app, I learned how to move it. I really enjoyed seeing how **my ideas could come to life**.”
